

Job Description

Changing Lives at Home Mental Health Inc. is an Outpatient Mental Health Clinic providing therapy, medication management and substance abuse treatment to our clients. We are looking for a dedicated mental health therapist to perform the job functions below. The ideal candidate will have experience working in community settings including the home and various out-of-home placements. Experience with and knowledge of high risk youth populations including: youth with history of incarceration and trauma. Case management experience and proven track record of navigating various systems, including resource connection for advocacy, housing, employment search etc. is required.

Job Functions:

- Conduct individual, family, and group counseling/therapy with clients and families.
- Provide community based interventions/visits as necessary
- Provide or arrange for clinically appropriate prevention, early intervention, and treatment services, initiating outside service referrals as necessary.
- Must possess knowledge of community resources and how to access such resources; family dynamics; crisis intervention/management; and strong organizational and communication skills.
- Complete assessments including intake protocol, annual assessments, diagnostic assessments and designated pre and post treatment assessments (such as OMS) on all clients on treatment caseload.
- Participate in individual crisis interventions as needed.
- Complete documentation as required by licensure and company in an accurate and timely manner.
- Provide case management including treatment planning for clients as assigned
- Maintain acceptable billable encounters according to employee contract and caseload assignments
- Ensure all clients are seen at least weekly in accordance to program guidelines – follow up as needed
- Complete other tasks as assigned.

Qualifications:

A valid driver's license and vehicle is preferred.

Education and Licensure:

Master's Degree in Social Services or a related field. LMSW, LGPC, LCSW, LCPC required.

Experience:

- Two or more years of experience providing supervised mental health therapy in office or community settings.
- Experience providing mental health therapy to clients with substance abuse and trauma

Job Type: Full-time
