How many participants should each applicant expect to serve?

As stated in the RFP, each organization would ideally serve 50 youth. The applicant must specify in their proposal the number of clients they will serve, based on their staffing plan. Please note that selected providers will need to report how many participants have been served.

Can you explain a little about fiscal sponsorship?

Typically, in this context, a fiscal sponsorship is when a larger, perhaps more established, organization serves as a financial administrator for the sponsored nonprofit. For example, charitable contributions are given to the fiscal sponsor, which then grants them to the nonprofit to support a given program.
